

Chester County Brownfields Consultant

The Chester County Economic Development Council (CCEDC) has selected Onesky Engineering, Inc. to assist them with a large ***Brownfields Acquisition and Redevelopment*** project that will benefit Chester County and the region. Chosen from a competitive group of eighteen highly qualified consulting firms, Onesky Engineering, Inc. will be providing a variety of environmental services to the CCEDC. The initial phase of the project will involve completion of a Phase I Environmental Site Assessment (ESA) conducted in accordance with the newly amended ASTM Phase I ESA Standard to include ***All Appropriate Inquiry***. Funding for the project is provided by a federal grant and therefore will involve direct interaction with the United States Environmental Protection Agency (USEPA) throughout all phases of the project. Environmental impacts encountered during the investigation will be addressed under the ***PADEP Land Recycling Program***, so the interested parties may receive ***Act 2 Liability Protection***. The former use of the site suggests a Phase II ESA will be required. Heidi Ruddy is our key staff member to handle the responsibility that surrounds this important project because of her extensive experience with other large-scale projects and her training and experience in the Phase I ESA arena.. Onesky Engineering, Inc. is eager to lend our knowledge the Chester County Development Council with their Brownfields Acquisition and Redevelopment project.
